
Title: Introduction to the Extinct Races of the Lands

Author: Jaggerauth

Introduction to the
Extinct Races of the
Lands

Britannia, and before
that, Sosaria, for that
was the world long before
the shattering of the

Gem of Immortality, was
home to a large number
of beings which no longer
inhabit the world today,
or if they do, their
presence remains
mysterious to us.

Many of these races,
creatures, and species
have perished or
mysteriously disappeared
over the shaping of the
world into the state that
it is in today, and their
existence is only known

due to the diligence of
scholars, historians, and
anthropologists.

Unfortunately much of
what can be said about
some of these races
comes from a point of

speculation, as nobody
alive today can say for
sure what these peoples
and creatures were like.
So pay special heed when
reading about these
subjects, for their
histories can be brought

into question. A simple
historical inaccuracy down
the line of ages

triplicates its inaccuracies
into these days. In
essence, everything must
be taken with a grain of
salt and a healthy dose

of contextualization.
